This is one of my favourite games! The last updates were great, I can't wait to see what else is coming.

. A passable riff on Bomberman.. loved it.

perfect gun play, ridiculous story straight from 2005 ^-^. its good game. Good card game with strategy in placing monster card, using item, and challenge mission.

Story rather short with many time cosumed for grinding card.

Card variety is plenty (1000++) with each card have its own stat, skill, and aura type.

. Okay, it took me about an hour to understand the concept of this game.

First of all, it's in the style of "Castlevania-whatever else games" in that style you know, etc.

Secondly and the most important part of this game is that it's actually based around you dying. Follow me on this:

You're a toy named Brand and every night you come alive and have to fight other toys that are the "Lost Ones" meaning that they don't have an owner anymore, also every night the house changes randomly, heavily RNG based, for example you could find a slot machine in the first room in the first night and it wouldn't be there in the second night, etc.

While the RNG mechanic seems lackluster due to enemies actually happening to get stuck between the RNG'd beams that don't allow them to jump or move anymore, it's actually helpful to you. You have only 6 inventory slots and when you die any cash (nuts) you have and whatever items you grabbed from the other toys to fill those 6 slots are put into your room.

In your room you can craft new weapons if you RNG-find the blueprint or heavily fortify the room with the cash and materials you got from other toys.

It's like that one movie with Tom Cruise. I'm totally digging it.. Grand Theft Auto ripoff, it's fun though. I'd say this is a pretty big improvement on the original Train Valley because it's less random and thus more strategic.

In my opinion, the levels are too easy to complete, although that's not a huge problem considering there will be more levels when the full game is released, and I'm sure those will increase difficulty.

The custom level editor is useful as well. Though I've only tried it for a few minutes (I found it kind of clunky and hard to learn), there have been some great levels in the workshop.

Overall, I think it's quite a fun micromanagement game. I personally am a fan of the poly art graphics and I find the maps to be enjoyable.. Its got potential. Its very basic but if they add AI tanks and multiplayer like it says then it can be a great game. The graphics are alright and sound is simple. Hope the devs update to what they said they will. Would recomend when AI tanks and mulitplayer gets added.

U kina have to get this game.

I first discovered serious sam when i was 9, the first one i played was serious sam 2 lol. Ive got all the main games in the serious sam series since i got serious sam 1 and 2 encounet for xbox. I have the serious sam double d and the best ps2 game, serious sam the next encounet. AND DONT FORGET THE LEGENDERY SAM 3. So i reacently got steam, played f2p games for a few months. Today, the day this has been typed ITS MY BIRTHDAY XD, so i got goat simulator, and this godly game. The cons: child graphics, and a bit too bright for a sam game. AMAZING THINGS: Does not lag on this terrible PC, buiteful landscape and non stop surprises! So get this game.. Fun for a bit, after a few hours nothing seems imposing anymore however. For the price and scaring your friends, not a bad purchase.. I never write game reviews however; with consideration that this game is in early access and this is a first day review after only two hours of game play, I would like to say that this game is amazing and you should totally get it. Pretty much no glitches and everything runs smoothly.

The gameplay is engaging and the developers have put much attention into details. Even little ones like the butcher. Out of curiosity, I thought i'd make sure my town's butcher wasnt slacking and decided to follow him. When I first found him he was on his way to the pig farm. Upon arrival he opened the fence, and walked into the pig pen. I then discovered that he is a pig whisperer and with no hassle at all, he walked up to a pig and it followed him out as a matter of fact, the pig followed the mysterious butcher to it's dark fate. After they both walk into the butcher shop, a small pig squeel noise is made followed by the butcher walking out with two pork chops. He then places the pork chops on the dirty floor, leaving them for some stranger to carry off to the warehouse - No dangers there. Before he leaves entirely he sharpens his blade on a saw and makes his way to the pig farm to do it all again.

The pork chops alone could have persuaded me to purchase this. Anyway, great game and I hope the developers stick with it because It has GREAT potential!

There are however a few things I think the game could add:

Update 1:

A problem i'm noticing at the moment is the camera angle can get slightly annoying. I think it would be great if we could go lower to the ground and have more flexibility with looking up and down.

It would be amazing if we could perhaps take a first person view when going through our village.. great job!  
add some melee wpn plz =). simple and adventrest great game for half a buck
